ABSTRACT

The statistical almanac makes up two of Project Baseline's fourth national report, a study of vocational education programs based on State and Federal records and other sources. A series of 75 tables are presented in three sections. Section one contains 37 one-year tables based on State data collected in fiscal year 1974. Tables are divided into four groups: enrollment figures, completion and placements, expenditures, and teacher and teacher education information. Section two contains four year comparison tables based on State data collected during 1971-74. Comparisons are made between the years by State and by area of concern: enrollments, completions and placements, expenditures, and teachers. Section three contains three miscellaneous tables: one table depicts the purchasing power of vocational education expenditures over the past 11 years, and two one-year tables show 1973-74 enrollments in special programs which were completed too late for inclusion in the computer series. SECTION I

One-Year Tables
1973 - 74

Section I contains the tables based on data collected in Fiscal Year 1974.

These tables are divided into four groups: Tables 1-16 include enrollment figures; Tables 17-20 concern completions and placements; Tables 21-35 present expenditures; and Tables 36 and 37 contain teacher and teacher education information.

The 1973-74 tables conform as closely as possible to the format of one-year tables used in the three previous Project Baseline Annual Reports. However, changes in the USOE reporting forms have necessitated deletion of some tables appearing in Volumes 1, 2, and 3.

Four new tables (32-35) have been added this year showing Part C and Part D expenditures and Federal allocations.

[1] FIGURES IN THIS COLUMN DIFFER FROM FIGURES SHOWN IN VOLUMES I AND II OF LEARNING A LIVING ACROSS THE NATION BECAUSE STUDENTS BELOW GRADE NINE HAVE BEEN ADDED TO SECONDARY ENROLLMENT AND THEREFORE, TO TOTAL VOCATIONAL EDUCATION ENROLLMENT.

[2] REDEFINITION OF HANDICAPPED BY MANY STATES HAS RESULTED IN A LOWER PERCENTAGE OF HANDICAPPED STUDENTS IN VOCATIONAL EDUCATION. ACCORDING TO THE FEDERAL GOVERNMENT ONLY THOSE STUDENTS IN SPECIAL HANDICAPPED PROGRAMS OR HANDICAPPED STUDENTS IN REGULAR PROGRAMS WHO RECEIVE SPECIAL SERVICES, MAY BE COUNTED AS HANDICAPPED.

[1]Some figures in this column may differ from figures shown in Volumes I, II, and III of Learning A Living Across The Nation because updated expenditure figures have been used.

[2]The figures in this column include all Federal carryover unobligated funds, Federal and State/local unpaid obligations, and total Federal and State/local outlays and are comparable to the figure for the previous Fiscal Years.

[3]The data in this column differ slightly from those of previous years due to change in the Federal reporting requirements. Expenditures in some States do not include one or more of the following: Federal unobligated carryover, Federal unpaid obligations, State/local unpaid obligations, expenditures for research coordination units, or expenditures for work study administration.

[4]This figure is an estimate made by the California State Division of Vocational Education dated January 29, 1973.

[5]The expenditures used to compute this figure are (1) Federal expenditure by level made by Project Baseline based on national percentages of enrollment and expenditures and projections from data supplied by California in previous Fiscal Years, and (2) State/local expenditure estimates by level made by the California State Division of Vocational Education dated January 29, 1973.

[6]This figure includes some funds spent at the post-secondary and adult levels which could not be separately identified.

[1]Some figures in this column may differ from figures shown in Volumes I, II, and III of Learning A Living Across The Nation because updated expenditure figures have been used.

[2]The figures in this column include all Federal carryover unobligated funds, Federal and State/local unpaid obligations, and total Federal and State/local outlays and are comparable to the figures for the previous Fiscal Years.

[3]The data in this column differ slightly from those of previous years due to changes in the Federal reporting requirements. Expenditures in some States do not include one or more of the following: Federal unobligated carryover, Federal unpaid obligations, expenditures for research coordination units, or expenditures for work study administration.

[4]This figure is an estimate made by the California Division of Vocational Education dated January 29, 1975.

[5]The expenditures used to compute this figure are (1) Federal expenditure estimates by level made by Project Baseline based on national percentages of enrollment and expenditures and projections from data supplied by California in previous Fiscal Years, and (2) State/local expenditure estimates by level made by the California State Division of Vocational Education dated January 29, 1975.

[6]Post-secondary financial data submitted by Maine include the cost of related instruction and ancillary student services. They do not reflect revenue from tuition, room and board, and other sources which would significantly reduce the post-secondary expenditure.

[7]Some funds spent at the post-secondary level could not be separately identified and are included in the secondary figure for FY 1974 on the preceding table.

[1] Some figures in this column may differ from figures shown in Volumes I, II, and III of Learning A Living Across The Nation because updated expenditure figures have been used.

[2] The figures in this column include all Federal carryover unobligated funds, Federal and State/local unpaid obligations, and total Federal and State/local outlays and are comparable to the figures for the previous Fiscal Years.

[3] The data in this column differ slightly from those of previous years due to changes in the Federal reporting requirements. Expenditures in some States do not include one or more of the following: Federal unobligated carryover, Federal unpaid obligations, State/local unpaid obligations, expenditures for research coordination units, or expenditures for work study administration.

[4] This figure is an estimate made by the California State Division of Vocational Education dated January 29, 1975.

[5] The expenditures used to compute this figure are (1) Federal expenditure estimates by level made by Project Baseline based on national percentages of enrollment and expenditures and projections from data supplied by California in previous Fiscal Years, and (2) State/local expenditure estimates by level made by the California State Division of Vocational Education dated January 29, 1975.

[6] Some funds spent at the adult level could not be separately identified and are included in the secondary figure for FY 1974.

Miscellaneous Tables

SECTION III

Miscellaneous Tables

Setion III consists of three miscellaneous tables (73-75).

Table 73 depicts the purchasing power of Vocational Education expenditures over the past eleven years.

Tables 74 and 75 are each one-year tables showing enrollments in special programs in Fiscal Years 1973 and 1974. These tables were completed too late for inclusion in the computer series.
